XD Vision: Defining the Future of Cross-Domain Collaboration

Michael Blake

Technical Fellow

Owl Cyber Defense

Abstract:

In this session, cross domain solutions (CDS) pioneer and Owl Cyber Defense Technical Fellow, Michael Blake will demonstrate how XD Vision enables real-time multi-domain voice and video communication with full context and nuance in the most critical situations and environments. Whether you're working across branches, special access programs, agencies, or even coalition networks, XD Vision offers the live, actionable coordination and collaboration needed to maintain decision advantage and information dominance.

Key Takeaways:

- Understand the significance and benefits of multi-domain communication across networks of differing security levels
- Learn how XD Vision helps remove operational silos and connect securely and seamlessly across multiple domains
- Experience a walkthrough of XD Vision's revolutionary features and architecture
- Discover how XD Vision supports the growing need for operational efficiency and situational awareness across all connected domains
