MOST COMPANIES TALK ABOUT DELIVERING BUSINESS AND TECHNOLOGY OUTCOMES.
WE DO IT.

Our customers have used our Integration Technology Centers to:

Stage their entire data center technology infrastructure during facility construction

Rack and stack components from multiple manufacturers into ready-to-deploy systems

Configure thousands of network, collaboration, security and end-user devices

INTEGRATION TECHNOLOGY CENTERS

WWT's Integration Technology Centers are climate-controlled production environments with advanced networking, secure remote access, and certified procedures specifically designed for staging, kitting and configuring the latest advanced technology solutions. WWT operates these centers in the U.S., the Netherlands and Singapore. They are staffed with certified engineers with logistical and technical expertise help reduce the risk, cost and complexity of IT deployments.

INCREASE DEPLOYMENT SPEED AND REDUCE COSTS

Skilled technology professionals operate more than 55,000 square feet of secure integration space with the capacity to simultaneously configure and integrate thousands of systems per week. WWT rack integration solutions combine technology from leading manufacturers, including Cisco, Dell EMC, NetApp, HP, VMware, APC and many others. WWT provides controlled environments where tasks can be performed on equipment to help customers move from planning and designing a new or evolving technology to implementing it. We asset tag, test, burn in, cable, rack, configure and integrate multi-vendor solutions prior to delivery. The ability to pre-configure technology platforms and devices before shipment to site increases deployment speed and can reduce field engineering costs by 25 to 40 percent, increase order processing speed by 20 percent and reduce maintenance costs by 7 percent.

REDUCE RISK AND COMPLEXITY

WWT's Integration Technology Centers meet the highest industry standards for quality control, secure supply chain services and inventory management. Work instructions for each customer engagement are documented in our quality system and electronically tracked on a per-asset basis. Individual components and integrated systems are fully tested prior to delivery, lowering the risk of hardware failures in our customers' production environments.

ENHANCE PERFORMANCE AND VISIBILITY

Integration Technology Center infrastructure offers customers a lab environment that is supported by a dedicated data center for proof-of-concept testing, centralized configuration management and remote solutions demonstrations. Using VPN access with streaming video, customers can observe the integration process in real time, with virtual hands-on access to allow remote configuration, testing and evaluation prior to on-site delivery.

GLOBAL PRESENCE

Provide products and services in more than 60 countries
Serve 125 distinct global customers
More than 2 million square feet of warehouse, distribution and integration space
Headquartered in St. Louis, Missouri

STRATEGIC PARTNERSHIPS

In addition to the following leading OEMs, WWT offers technology products from more than 3,000 manufacturers around the world, so we can provide each customer with precisely the right solutions:

Cisco Systems Gold Certified Partner	Hewlett Packard Enterprise Platinum Partner
Dell EMC Titanium Black Partner	NetApp Star Partner
F5 Platinum Partner	VMware Premier Partner
Hewlett Packard Platinum Partner	

CERTIFICATIONS

We have more than 2,000 engineers and technology professionals available to perform product demonstrations in a virtual environment accessible from anywhere around the world. Our engineers stay abreast of the latest technology developments through continuous training and close working relationships with OEM personnel.

FINANCIAL STRENGTH

With more than $11 billion in annual revenue, WWT continues to achieve consistent financial growth as a privately-held technology solution provider and offers strength and stability, allowing our customers to feel secure in long-term business partnerships.

OUR CUSTOMERS

COMMERCIAL
40+ Fortune 100 Customers

PUBLIC SECTOR
8 Federal Acquisition Contracts
20+ State and Local Contracts

SERVICE PROVIDER
Telecommunications, Cable, Hosting, Web Services

RECOGNITION

CISCO
Global Americas Partner of the Year (2016)
Global Architectural Excellence Partner of the Year, Enterprise Networks (2016)
Americas Enterprise Partner of the Year (2016)
Global Solution Innovation Partner of the Year (2015)

DELL EMC
Large VAR Partner of the Year (2016)
Enterprise Partner of the Year (2014, 2013)

NETAPP
National Partner of the Year (2015, 2014), #2 Global (2014)
Defense Partner of the Year (2015)
#1 FlexPod Partner (2015)
E-series, OCI, cDOT and Flash Partner (2015, 2014)

VMWARE
Federal Partner of the Year (2014)
SDDC Federal Partner of the Year (2014)

F5
Unity U.S. Partner of the Year (2016)
Unity Innovation Partner of the Year for Americas (2015)
