

# Network Infrastructure

## State-of-the-Art Network Design and Implementation

CACI delivers industry leading expertise and technology for network infrastructure design, implementation, and optimization of networks for communications and IT sensor integration. Our networks enable quick, reliable, and secure transmission of mission-critical data, including communications and IT sensors on the same network. We enable secured state-of-the-art communications around the globe and to the tactical edge. We have worldwide experience with more than 30 years of mastery in design and upgrading Outside Plant (OSP) and Inside Plant (ISP) Infrastructure, and the execution rigor to adhere to a variety of systems and requirements. Our wired and wireless solutions provide agile, flexible, and user-centric network technologies to stay ahead of growing demands for transmitting and receiving large amounts of data with the speed, security, and reliability customers expect for continuity of operations and mission success. CACI delivers Commercial Solutions for Classified (CSfC) and is identified on the NSA CSfC Trusted Integrator list. Our experience, expertise, and technology deliver quality through active collaboration with customers for affordable infrastructure that maintains and enhances mission continuity. Our solutions are highly secure from inception; security is integrated into designs and carried through implementation. **We deliver agility, efficiency, speed and performance for today's enterprise missions.**

A *Fortune* World's Most Admired Company

EXPERTISE AND TECHNOLOGY FOR NATIONAL SECURITY

**CACI**  
EVER VIGILANT

## Modernizing Unified Network Infrastructure

### Features

- Network modernization
  - Software Defined Networks
  - Zero Trust Architecture
- Network architecture, design, integration, installation, and certification
- Migration to and use of the latest technologies
- CSfC- MILS
- Secure by design
- Voice networks
- Optical transport networks
- Wireless networking
- Vendor and technology agnostic solutions
- Multi-level secure networks

### Benefits

- Integrated turnkey network solutions
- Highly reliable and available communications that are secured from rapidly evolving cyber threats
- Network continuity during migration, upgrade, or installation
- ISO-certified project management processes

## Commercial Solutions for Classified (CSfC)

CACI's CSfC solutions use two layers of National Security Agency (NSA) approved, commercial encryption to protect our customers classified data. The outer and inner Virtual Private Network (VPN) technologies and cryptographic library reduce the Cyber-attack surface by limiting or eliminating end point vulnerabilities enabling access to classified networks throughout the Installation Campus Area Networks (ICAN).

**ID Technologies, A CACI Company** - In 2022, CACI acquired ID Technologies, an innovative enterprise IT, Infrastructure-as-a-Service, and network modernization provider with NSA-compliant CSfC technology. The acquisition of ID Technologies expands CACI's secure network modernization capabilities with CSfC capabilities equipping U.S. Government workers with modern devices to operate virtually anywhere within essential systems that are vital to national security.

EXPERTISE AND TECHNOLOGY  
FOR NATIONAL SECURITY

CACI's 22,000 talented employees are vigilant in providing the unique expertise and distinctive technology that address our customers' greatest enterprise and mission challenges. Our culture of good character, innovation, and excellence drives our success and earns us recognition as a *Fortune* World's Most Admired Company. As a member of the *Fortune* 1000 Largest Companies, the Russell 1000 Index, and the S&P MidCap 400 Index, we consistently deliver strong shareholder value.
