

TRACY HULVER
Senior Director, Digital Identity - IDEMIA

Tracy Hulver has been recognized as a visionary leader in the cybersecurity and identity markets for the past 20 years. He currently leads IDEMIA's Digital Identity Business Development team focusing on the Federal and State Government markets. He has served as vice president of products and marketing for several world-class organizations including McAfee Security, CyberTrust, and was Chief Identity Strategist for Verizon Wireless where he received a patent for strong, password-less authentication. He is a globally sought-after speaker in the areas of cyber-attacks and security intelligence. Mr. Hulver has served as a member of the Computer Security Institute, the National Cyber Security Alliance, the Information Systems Security Association, the Cloud Security Alliance, was recently a board member of the Open Identity Exchange and currently is a member of the Better Identity Coalition and Security Technology Alliance. He was also a founding member on the Department of Homeland Security's National Cyber Security task force.

Mr. Hulver holds a bachelor's of science in business administration with a minor in computer science.
