### Where will my outlet be located?

X

There are four different types of trade show booths: In-line Booths, Peninsula Booths, Back-to-Back Peninsula Booths and Island Booths.

Each type of booth has its own method of installation. In the following diagrams, the symbol  represents the approximate location of power outlets.

In-line Booths

Peninsula Booth

Back-to-Back Peninsula Booths

*One Drop within booth when power Source is meeting or one location on perimeter when power source is in the floor.*

Island Booths

**In-line Booths, Peninsula Booths, or Back-to-Back Peninsula Booths:** Your pre-ordered Electrical Outlet will be installed at the rear of your booth, at the drape line.

**Island Booths:** You need to designate one location for each outlet you order. Multiple outlet locations will be charged on a Labor and Material basis. For facilities with power originating in the floor, your Electrical Outlet will be placed at one location at our discretion. All other distribution will be done on a Time and Material basis. If you fail to provide us with a floorplan, we will bring your power to one location at our discretion.

#### ELECTRICAL CODE

##### Electrical Services for Exhibits at Convention Facilities

Electrical requirements for an exhibit at all convention facilities are for the safety of all exhibitors and are based on national Electrical Codes and local ordinances.

Too frequently, fires have been traceable to faulty wiring, sometimes because of carelessness and sometimes because of lack of understanding of the risks involved.

In the interest of public safety, exhibits in the convention facilities may be inspected to determine if any violations exist. If they are found, qualified electricians are available to correct the problems. This work will be performed on a time and material basis. If the exhibitor does not wish to have the fault corrected, electrical services to the offending booth will not be connected.

If an exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to convention facilities. Serious risks are involved which can be eliminated by understanding basic requirements of safe wiring inside your booth. For the safety of you and the public, remember these points:

- All wiring must have a 3-wire grounded cord with a minimum of #14 gauge.
- Spot or floor lighting is a hazard when lamps are too close to fabrics or other materials which can be affected by heat.
- The use of clip-on sign sockets, latex or lamp cord wire in displays, or the use of 2-wire clamp on fixtures, is prohibited by order of fire prevention bureaus at trade shows and conventions.

Zip cords or two-wire cords are ungrounded and could result in safety hazards. Their use is forbidden in all convention facilities.

PLEASE LEAVE ALL 2-WIRE CORDS AT HOME!
