***Using AI Agents and RAG to Augment the Cyber Warfighter***

**Ed Sealing**

Chief Technology Officer

SealingTech

**Abstract:**

Over the last 12 months, SealingTech has conducted research and development efforts into the use of Large Language Models (LLMs) to augment the cyber workforce through retrieval augmented generation (RAG) and AI agents.

In this talk, Ed Sealing, Chief Technology Officer at SealingTech, will discuss some of the findings and use cases and demonstrate how AI Agents can interact with DoD cyber defense systems to augment cyber defenders.
